### Marine-Grade Aluminum: Superior Durability and Quality

Marine-grade aluminum is widely recognized for its corrosion resistance, even in highly humid environments or those exposed to salt air.

Lightweight and durable, this material combines high performance with a refined aesthetic, making it ideal for applications requiring premium finishes and long-lasting reliability. Additionally, it is 100% recyclable, contributing to a more sustainable and high-standard product.

### Available colors and finishes:

- Matte aluminum
- Brushed aluminum
- Matte black
- Brushed black
- Matte gold
- Brushed gold

# W-BLIND P ALUMINIUM

## NEURAL SERIES

This equipment must be used in home automation systems respecting its functions and the power limits described in this manual. Always with technical guidance.
